

CHANDRAKISHOR TIWARI

Senior Software Engineer & Frontend Lead — React.js / Next.js / React Native

Delhi, India • +91 9953721519 • chandrakishort20@gmail.com
linkedin.com/in/chandrakishor • github.com/ck007tiwari

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer & Frontend Lead with 5+ years of experience architecting high-performance, scalable web and mobile applications. Specialized in React.js, Next.js, TypeScript, and React Native, with a proven track record integrating 3,000+ APIs, leading large-scale legacy modernizations (React 18 / MUI migrations), and driving measurable improvements in code quality and performance. Full-stack capable with Python (FastAPI) and PostgreSQL. Skilled in cross-functional collaboration, architectural refactoring, and mentoring engineers to accelerate team velocity.

CORE COMPETENCIES & TECHNICAL SKILLS

Frontend

React.js, React Native, Next.js, JavaScript (ES6+), TypeScript, Vite, React Hooks, HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Material-UI (MUI), Radix UI / shadcn-ui, Ant Design

State & Data

Redux Toolkit, RTK Query, Zustand, TanStack Query (React Query), TanStack Table, WebSockets, RESTful APIs

Backend & Cloud

Node.js, Express.js, Python, FastAPI, PostgreSQL, MongoDB, Supabase, AWS, Docker

Tools & Dev Quality

Git, SonarQube, Sentry (Error Monitoring & Observability), Figma, D3.js, Chart.js, Formik, React Hook Form, Yup, Vitest, Unit Testing

Methodologies

Agile/Scrum, Team Leadership, Legacy Modernization & Framework Migrations, Atomic Design (Design Systems), UAT Management

PROFESSIONAL EXPERIENCE

Q3 Technologies Pvt. Ltd. | Boston, MA (Hybrid)

Feb 2025 – Present

Sr. Software Engineer

- Technical Ownership:** Assumed end-to-end ownership of the frontend repository, contributing 80% of total project commits (1,606 total) and managing 214k+ lines of code changes across 352 unique files with zero downtime.
- Code Quality & Governance:** Drastically improved security and maintainability by reducing SonarQube issues from 376 to 0 and eliminating all 27 active bugs.
- Real-Time Engineering:** Developed resilient WebSocket handling and batch-fetching logic for stable, high-performance real-time graph updates across thousands of concurrent data points.
- Architectural Refactoring:** Refactored core modules, deleting 50% of redundant code while increasing reusability and reducing cyclomatic complexity.
- Mentorship & Scaling:** Onboarded junior developers and cross-trained a Java developer to React proficiency within 10 days.
- UI/UX Transformation:** Executed a full-scale UI overhaul using Atomic Design patterns, translating Figma specs into a reusable component library.
- Release Management:** Orchestrated monthly release cycles and UAT integrations, maintaining ~60 commits per month.
- Legacy Modernization (Rail Operations Platform):** Driving the React 18 + MUI v9 upgrade of a 5-year-old enterprise rail stock & crew-planning platform (12,500+ PRs) — migrated legacy Material-UI/JSS styling across hundreds of components, coordinated upgrade branches for 6+ functional modules, and authored the platform's Software Design Specification.
- Product Delivery (Transport Status App):** Primary engineer (95% of commits) on a real-time London transport status application built on TfL Open Data — React 18, TypeScript, Vite, Tailwind CSS, Radix UI/shadcn, Supabase, and TanStack Query — with live arrivals/departures boards and service-disruption views; authored the client-facing API documentation.
- Backend Engineering:** Built a Python FastAPI service connecting three PostgreSQL databases with async SQLAlchemy, featuring cross-database joins, an EXPLAIN ANALYZE-driven index-recommendation engine, and auto-generated schema documentation with change detection.
- Observability:** Introduced Sentry error monitoring across React applications — source-map uploads via the Vite plugin, release tracking, and alert-rule design — validated through dedicated POC apps ahead of production rollout.

Harns Technology Pvt. Ltd. | Bengaluru, India (Remote)

Sep 2022 – Jan 2025

Software Development Engineer-II (SDE-II)

- **Platform Development:** Engineered the Woovet Online Pet Hospital platform, scaling to support multiple international clinics; mapped 500+ routes and integrated 3,000+ APIs. [See case study →](#)
- **Payment Integration:** Integrated Telr and Clover Connect payment gateways for secure, multi-regional transactions.
- **Dashboard Creation:** Designed and implemented the Woovet Admin and CEO Dashboards using D3.js and Chart.js.
- **Mobile App Leadership:** Led end-to-end development of a React Native eCommerce app for a Dubai-based client; improved load times via client- and server-side caching (Redux, TanStack Query).
- **Feature Engineering:** Integrated Google Analytics, Tamara payment gateway, and Android push notifications; built pagination/caching for thousands of products.
- **Project Delivery:** Delivered 4 high-impact projects within 2.5 years with multilingual support for global accessibility.

Mindrops Pvt. Ltd. | Delhi, India
Software Developer Associate

Mar 2022 – Aug 2022

- **Full-Stack Delivery:** Built the Admin Call-Record Log Dashboard (React, Node.js), managing data for thousands of users.
- **Rapid Development:** Delivered 3 distinct client projects, including a responsive horticulture platform, within 6 months.

Mindrops Pvt. Ltd. | Delhi, India
Software Developer Intern

Oct 2021 – Mar 2022

- **Frontend UI:** Developed responsive interfaces using React.js and Redux, assisting in the release of full-stack MERN features.

EDUCATION

Master of Computer Applications (MCA)
IGNOU, Delhi | 2024 – 2026 (In Progress)

Bachelor of Arts (BA)
School of Open Learning, Delhi University | 2019 – 2022

Diploma in Engineering
H.S.B.T.E | 2014 – 2016

CERTIFICATIONS & AWARDS

Certifications: ReactJS (Hooks, Redux, Next.js); Node.js/MongoDB Bootcamp; Web Developer Bootcamp — Udemy

Awards: Team Leadership Commendation (2024)
